Professional Summary

Full-stack developer specializing in scalable web applications, developer tools, authentication systems and backend APIs. Experienced building production-style applications using React, Next.js, TypeScript, Node.js, PHP, PostgreSQL and MySQL through internships and self-driven projects. Passionate about solving complex engineering problems and building practical developer-focused software.

Experience

CodSoft

Web Development Intern

Remote

Jul 2026 – Aug 2026

- Developed two production-style full-stack applications using React, Node.js, Express.js and MongoDB following responsive design principles.
- Built secure authentication, REST APIs, CRUD operations, search and filtering functionality while integrating backend services with database workflows.
- Designed project dashboards, reusable UI components and task management features to improve usability and maintainable code structure.
- Collaborated using Git and GitHub while following Agile development practices for feature implementation and version control.

Projects

Snipt

GitHub

- Built a lightweight code-sharing platform that enables users to instantly create and share code snippets through secure, shareable links without requiring an account.
- Implemented optional password protection, automatic link expiration, ZIP archive uploads, automatic language detection and one-click code copying.
- Developed the application using PHP, MySQL, JavaScript, HTML and CSS with secure input handling and responsive interfaces.

Axiom

GitHub

- Extended an open-source authorization platform supporting RBAC, ABAC, organizations, plan entitlements and usage limits for multi-tenant applications.
- Developed organization-level role management, policy simulation and permission validation to simplify fine-grained access control.
- Built using Next.js, TypeScript, Hono, Prisma ORM, Auth.js, Neon PostgreSQL and Turborepo.

Orbit

GitHub

- Developed a full-stack project management platform for organizing projects and tasks with authenticated user workflows and responsive dashboards.
- Implemented authentication, project creation and management, task workflows and protected frontend/backend routes through REST APIs.
- Built a modular architecture using React, TypeScript, Node.js and Express.js with separate frontend and backend services.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL, C++, PHP, HTML5, CSS3

Frontend: React, Next.js, Vite, Tailwind CSS, Shadcn UI, Framer Motion

Backend: Node.js, Express.js, Hono, PHP, REST APIs, Auth.js, JWT

Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM, SQLite, Neon

Cloud & DevOps: Docker, AWS, Vercel

Developer Tools: Git, GitHub, Postman

Education

Maharaja Agrasen Institute of Technology (MAIT)

B.Tech in Electronics Engineering (VLSI)

Delhi, India

2023 – 2027
