Professional Summary

Full-stack developer specializing in scalable web applications, AI-powered platforms, authentication systems and role-based authorization. Experienced building production-style applications using React, Next.js, TypeScript, Node.js and PostgreSQL through internships, open-source contributions and self-driven projects. Passionate about solving complex engineering problems and building developer-focused software.

Experience

CodSoft

Web Development Intern

Remote

Jul 2026 – Aug 2026

- Developed two production-style full-stack applications using React, Node.js, Express.js and MongoDB following responsive design principles.
- Built secure authentication, REST APIs, CRUD operations, search and filtering functionality while integrating backend services with database workflows.
- Designed project dashboards, reusable UI components and task management features to improve usability and maintainable code structure.
- Collaborated using Git and GitHub while following Agile development practices for feature implementation and version control.

Projects

AutoQa

GitHub

- Built an AI-powered test automation platform that generates, manages and executes test cases from natural language requirements using LLM APIs.
- Implemented secure authentication, workspace invitations, role-based access control, project management and asynchronous testing workflows.
- Engineered a scalable full-stack architecture using Next.js, TypeScript, Node.js, Prisma and PostgreSQL with modular API design and reusable components.

Axiom

GitHub

- Extended an open-source authorization platform supporting RBAC, ABAC, organizations, plan entitlements and usage limits for multi-tenant applications.
- Developed organization-level role management, policy simulation and permission validation to simplify fine-grained access control.
- Built using Next.js, TypeScript, Hono, Prisma ORM, Auth.js, Neon PostgreSQL and Turborepo.

Reelink

GitHub

- Developed a creator marketplace connecting brands and influencers through secure role-based dashboards and campaign workflows.
- Designed creator onboarding, campaign applications, collaboration pipelines and protected routing using Prisma and PostgreSQL.
- Built responsive interfaces with Next.js, TypeScript, Tailwind CSS and modern authentication practices.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL, C++, HTML5, CSS3

Frontend: React, Next.js, Vite, Tailwind CSS, Shadcn UI, Framer Motion

Backend: Node.js, Express.js, Hono, REST APIs, Auth.js, JWT

Databases: PostgreSQL, MongoDB, Prisma ORM, SQLite, Neon

Cloud & DevOps: Docker, AWS, Vercel

Developer Tools: Git, GitHub, Postman

Education

Maharaja Agrasen Institute of Technology (MAIT)

B.Tech in Electronics Engineering (VLSI)

Delhi, India

2023 – 2027
